Technical data sheet APC19

- Ergonomic design for simple retrofit
- Fitted in seconds
- Incremental 'Click-lock' adjustment
- U.K. manufactured
- Robust ABS plastic construction

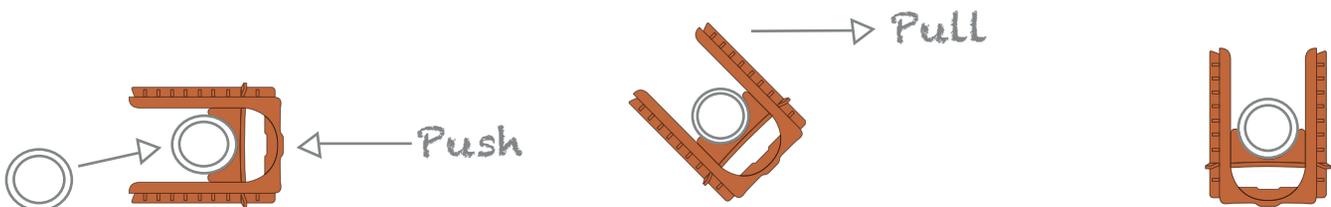

Statutory regulations require a minimum 19mm per metre slope to above ground condensate drains.

The Gel-clear APC19 is part of the bio-beta range of products for food retail refrigeration. A retrofit, adjustable pipe support for condensate drains running beneath chillers. Locks in place incremental slope settings. Statutory regulation requires a 19mm per metre slope on overground condensate drains.

Push-Pull installation for retrofitting to existing chiller drains

Fitted in seconds, the pipe support can be set at 10mm increments prior to fitting bringing BSEN12056 compliant sloping to flat drains.
